

# HPSG LaTeX with langsc-avm

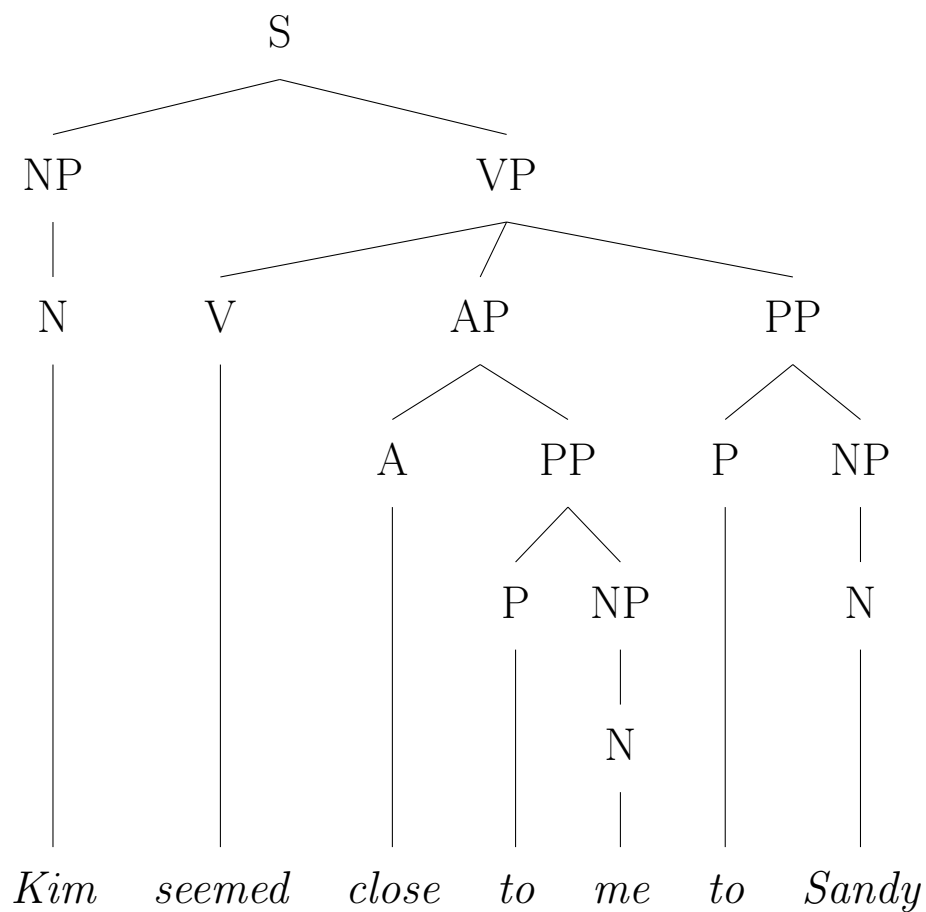

Francis Bond (rewritten)

October 2025

## 1 Prologue

## 2 Syntactic Tree

For trees, we still use `forest`:

### 3 AVM

We now use `langsci-avm`.

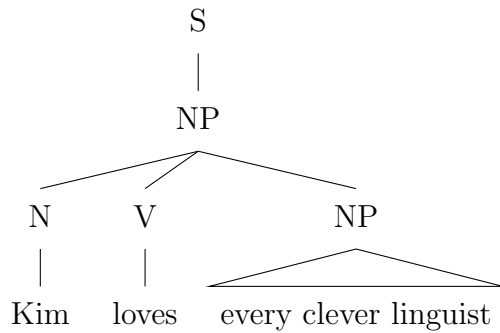

#### Binary Head-Complement Rule

$$\left\{ \left\{ \begin{array}{l} \textit{phrase} \\ \text{VAL} \left[ \text{COMPS} \langle \rangle \right] \end{array} \right\} \right\} \rightarrow \mathbf{H} \left\{ \left\{ \begin{array}{l} \textit{word} \\ \text{VAL} \left[ \text{COMPS} \langle \underline{1} \rangle \right] \end{array} \right\} \right\} \underline{1}$$

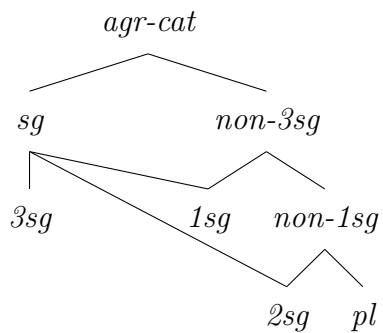

## Lexical Entry for *eat*

## 4 Tree and AVM

AVMs can be embedded in tree nodes:

## 5 Type Hierarchy

## 6 Numbered Examples

- (1) An example
- (2) *manmosu-wa zetumetu-shita*  
mammoth-TOP die.out-did  
“Mammoths died out.” [jpn]
- (3) Another example

You can refer back to example (2).
